

Accelerate Application Modernization with **CAST & AWS**

“Tired of lift-and-shift?”

“Are you in analysis paralysis trying to modernize an overwhelming number of applications?”

“Lost in modernizing a black-box custom application?”

“Wanting to modernize away from legacy tech e.g. Microsoft, VMware or mainframe?”

CAST & AWS Are Partnering On Application Modernization

By revealing automatically the detailed innerworkings of hundreds of custom applications or millions of lines of code in a week, CAST software intelligence makes application migration & modernization planning **3x-4x faster**, execution **25% faster** and **safer**. CAST technology covers **50+ languages**, **12+ databases**, **100s of development frameworks**.

CAST Highlight

Rapid insights across your entire portfolio

Migration & modernization roadmap in 4 Waves. Gartner 5R. Cloud Maturity. Cloud Blockers. Remediation effort estimates. Recommended AWS cloud-native services. Operational in a week across hundreds of applications.

CAST Imaging

Deep insights into your application's inner workings

The living knowledge base of your software internals. Automated. Find the answers that you need in minutes, instead of days.

Benefits of Modernization

Rapid Access to Innovation

Improved Security

Lower Licensing & Consumption Costs

Increased Flexibility

Industry-leading Performance

AWS can provide CAST software & services at no cost for application migration to AWS and modernization on AWS*
Accelerate assessments | Show a modernization path | De-risk and speed-up execution
